

Aspect v3.01.03

Issue Date: November 27 2017

Product: Aspect®

Product Version: 3.01.0.3

Summary

This maintenance update release addresses **CB / EC** communications issues on the **Aspect-Nexus™** platform.

Background

This is a maintenance update for the **Aspect** v3.01.02 revision.

Features and Installation

All files relevant to this release can be found on the [Dealer Toolbox](#) by visiting [Product Support](#) > [Firmware Updates](#) and [Product Support](#) > [Software Updates](#)

Installation

In order to take advantage of product enhancements and resolutions within **Aspect** v3.01.03, you must upgrade the firmware of your existing Aspect® target (**Aspect-Matrix MAX™**, **Aspect-Nexus™**, **Aspect-Facility™**, **Aspect-Enterprise™**) using the [System Update](#) feature within the [WebUI](#) of the target.

Instructions on this process can be found in the **Aspect-Studio™** Online Help at any time. Once your target's firmware has been updated, you must then open your existing project using **Aspect Studio** v3.01.03. Perform a Clean and then deploy your project to the target. This process **must** be done to ensure your project files receive all enhancements and updated drivers included as part of this maintenance release.

Resolved Issues

ASP-4496 Packet collision issues between **CB controllers/Engineering Center** and **Aspect-Nexus™** devices when communicating at 76.8k baud have been resolved.

Customer Impact

Customers using **Aspect-Nexus™** at 76.8k baud on existing Sites should upgrade to this version. All future installations should use this version or later.
