

CBT v7.9.0 Firmware

Issue Date: 09/Nov/2018

Product: CBT-3T6-5R, CBT12iVAV

Product Version: 7.9.0

Summary

CBT Firmware has been updated to prevent a **BACnet**[®] schedule losing its on/off time when the device name is edited or changed via **BACnet**[®].

Background

This is a scheduled update, keeping firmware versions consistent across our product range.

Features and Installation

Features

Resolved issues:

BUGFCBT-107 Weekly Schedules no longer lose events when the **CBT** controller device name is changed through BACnet.

Installation

To upgrade existing **CBT** controllers to this version, download the relevant `.bin` file from the `cylon-automatrix.com` Toolbox, and add it to a batch in the **CXpro^{HD} Site Organizer** to download it to all of the controllers on the **Site**.

Customer Impact

This update will be applied to new controllers.
