CYLON® TECHNICAL BULLETIN NO. 465

Issue Date: 15 June 2021

# ASPECT® v3.04.02

## Summary

ASPECT software and firmware have been updated support new NEXUS-3 hardware.

## Background

The NEXUS 2 hardware has reached an End-Of-Life status, and so ABB have identified hardware that can match all existing features and offer some additional benefits. ASPECT software and firmware have been adjusted to match the new hardware.

## Features

NEXUS-3 hardware is now supported

### IMPROVEMENTS

ASP-5485 Support for TLS 1.2 has been added on NEXUS-3.

### RESOLVED ISSUES

ASP-5503 BACnet Devices no longer randomly go offline after a failed ping returns an error code of 200

## Customer Impact

All NEXUS-3 hardware will ship with this version or later.

Existing hardware can be updated if affected by the resolved issue above.
