CYLON® TECHNICAL BULLETIN NO. 454
Issue Date: 2nd December 2020

# Aero<sup>BT</sup> v1.4 Release

## Summary

Support for **FLXeon** controllers has been added to **Aero**<sup>BT</sup>. The appearance of the app has also been changed to reflect the ABB brand.

## Background

As a result of the introduction of new controllers, **Aero**<sup>BT</sup> has been updated to support them.

## Features

During the coming week, the Google Play Store and Apple iStore will be distributing the next version of **Aero**<sup>BT</sup> (version 1.4). The biggest change you will see is the mobile app will be black-themed, and ABB branded. Your existing Cylon branded mobile app will be upgraded.

**Aero**<sup>BT</sup> version 1.4 will support the latest VAV operation that is included in the new **FLXeon FBVi-2U4-4T** VAV controller. Test and balance actions such as one- and two-point balancing can be performed.

Zero calibration of the flow sensor and air flow setpoints can also be carried out.

**Aero**<sup>BT</sup> will continue to support your existing **CBV** controllers.

## Customer Impact

Any customer wishing to use **Aero**<sup>BT</sup> to configure **FBVi-2U4-4T** products must upgrade to this version. The new version will continue to support your existing **CBV** controllers.
