INTEGRA™

niagara⁴ drivers

This document lists all previous Niagara AX drivers that are now available for Niagara 4. The old part numbers and descriptions are included from the Niagara AX Price List to clarify which equivalent features are now available for or included in Niagara 4 parts. Note that the licensing structure is different for Niagara AX *parts* versus Niagara 4 parts, even if you have upgraded a Niagara AX part to a Niagara 4 software *image.* That means that for existing Niagara AX Supervisors and legacy Integra controllers, customers will continue to use the Niagara AX Price List, even if they have purchased Maintenance to upgrade to a Niagara 4 image (drivers will still be purchased ad hoc, etc.).

Part number	Description	Long description	Legacy JACE® controllers (J3, J6, J7)	JACE® 8000
Integra Client Drivers				
DR-BACNET-AX	BACnet® IP Client	BACnet® IP Client over Ethernet	Available for purchase	Included
