# 1 Introduction

# WHAT IS THE CXpro<sup>HD</sup> SITE BACKUP UTILITY?

The CXpro<sup>HD</sup> Site Backup Utility (sometimes referred to as Backup) is a module of the Cylon software suite.

The **Cylon** system consists of hardware controllers linked together to form a 'Site', and software on a Supervisory PC. The **Cylon** software on the PC supervising the **Cylon** hardware uses data files, which are organised on the PC in a directory structure representing the structure of the Site.

**Backup** allows this directory structure, and any other relevant files to be archived, so that it can be installed on another PC, or restored to the original PC.

The main uses of the Site Backup Utility are:

# **COPYING A SITE TO ANOTHER PC**

For instance, if an engineer needs to visit a site, and needs to transfer site files (perhaps from the office PC to a laptop, or from a laptop to a site's supervisory PC) the files required for the site can be copied between PCs using this utility.

# SYNCHRONISING MODIFICATIONS TO A SITE

Several people may be working on different parts of a site, using separate PCs to modify strategies, globals and drawings. It is necessary at some time to compile all the changes into one copy of the site, on the site's supervisory PC. Using the **Site Backup Utility** it is possible to transfer only the modified files from each PC, and so synchronize all the changes on the main PC.

# MAKING A SECURITY COPY OF THE SITE

For security in case of damage to a supervisory PC, or its files, it is usually a good idea to keep a backup of the full site, which can be restored to the original PC, or replacement PC if required.

# 2 Using The Site Backup Utility

When the **CXpro<sup>HD</sup> Site Backup Utility** (**Backup**) is started, the **Backup** Interface (*see page 21*) is displayed. From the Menus and Toolbar Icons in the interface, all of the options in the **Site Backup Utility** can be accessed.

These options include:

- Backing up a site (see page 6)
- Restoring a site (see page 12)
- Viewing the contents of an existing backup (see page 17)
- Changing the current default site (see page 5)

Note: CXpro<sup>HD</sup> does not need to be running when you use the Site Backup Utility. However, CXpro<sup>HD</sup> must be installed on the PC, otherwise there would be no site structure for the Site Backup Utility to operate in.

## **STARTING BACKUP**

To start Backup, select its icon from the Utilites group in the Home tab of the Cxpro<sup>HD</sup> Ribbon:

Home	Controller	Strategy						
onnect sconnect Site	Copy	Site List		Strategy Help	Configuration Databa Interfa	se Datalog Ce Manager Utilities	-	Backup NB-P

Displayin	g a list of current	sites.						
	,							

# **BACKING UP A SITE**

'Backing Up' a site means copying some or all of the files associated with the site into a compressed **Backup** (".csb") file. The compressed file can either be stored, so that the site can be repaired if it becomes damaged on the original PC, or transferred to another PC, so that a duplicate of the site can be made. This can be used to set up a portable PC for a site visit, or to synchronize modifications made to a site on several PCs.

It is possible to back up a complete site, or parts of a site. For this reason, before a site can be backed up, it must first be prepared for backup i.e. you must set the Backup options, and select the files and directories to be backed up.

To back up a site, follow these steps:

- Set the Backup options
- Select the Directories and Files to be backed up
- **Run** the Backup.

## SETTING THE REQUIRED BACKUP OPTIONS

It is possible to change the criteria that the **Backup** utility will use when preparing a site for backup (i.e. selecting the files to be included in the .csb file).

You can either:

•	Select the required items	e Backup Options Restore Options H
	from the Backup Options	👂 🗸 🖄 Exclude *.BAK files
	menu.	ite 🗸 Exclude *.CSV files
		A Ignore "Backups" Directory

or,

• From the toolbar select the fifth button Select backup/restore options

🖓 😳 😓 🙁 💐 🗓

Backup Options on page 12.

#### SELECTING THE FILES TO BE BACKED UP

In order to create a backup of a site, you must first select the files to be included in the .csb file. This is known as 'preparing a site for backup'. The files are automatically selected based on the Backup Options (see

7

*The Options dialog* box on page 30), but you can manually add or remove directories and files from the backup set.

To select the files and directories:

First select the site to be backed up by clicking on it in the Site List tab of **Backup**'s Details window:

🔷 WN3000 Site Backup/Restore Utility - Id :0001/Mach0001 👘 🔳 💌
Eile Backup Options Restore Options Help
Site List Site Details Selected Files Explorer CCB Contents
Local Network
Office Block
~7
<u></u>
Displaying a list of current sites.

Next, put the program in **Preparation** mode using one of the following methods:

• From the File Menu, select the Prepare for Backup menu item:

• From the toolbar select the second button Prepare Site for backup:

• Press [Ctrl] + [F] simultaneously on the keyboard

## CXpro<sup>HD</sup> Site Backup Utility | Using The Site Backup Utility

Note:	If you select the Prepare for backup function without first selecting a site, the following message will appear:           CCB ackup Utility           You have not selected a site to backup!
	When you press the OK button, the program will return to its previous state. If a site is selected, a confirmation box will appear:
	Confirm Do you wish to prepare to back up site : OFFICE BLOCK

Note: The site contained in the message box will be the one selected from the site list and not necessarily "Office Block" as shown in the example above.

If you press the No button, the program will return back to its previous state.

If you press the Yes button, the Details Window will change to the Selected files tab.

The directories and files required to back up the selected site will appear in the two list boxes:

Site List Site Details Selected Files Explorer CCB Contents	
Directory(s)	
C:\WN3000V4\LAN\	
C:\WN3000V4\LAN\ARCHIVE\	
C:\WN3000V4\LAN\DBASE\	
C:\WN3000V4\LAN\DRAWINGS\	
C:\WVN3000V4\LAN\KEYPAD\	
C:\WN3000V4\LAN\MACROS\	
File(s)	
C:\WN3000V4\LAN\WN3000.VER	<b>_</b>
C:\WN3000V4\LAN\UNITS.INI	
C:\WN3000V4\LAN\REPORT.INI	
C:\WN3000V4\LAN\CCBACKUP.TXT	
C:\WN3000V4\LAN\ARCHIVE\WN3000.VER	
C:\WN3000V4\LAN\DBASE\UCC4.IDX	_

Once a site is displayed in the Selected Files tab, you can remove individual directory(s) or file(s) from the backup (see *Details Window - Selected Files tab* on page 27.

When the Selected Files tab displays all the directories and files to be backed up, you can proceed with running the Backup operation.

#### **RUNNING A SITE BACKUP**

Once a site has been **prepared for a backup**, by setting the options (*see page 6*) and files (*see page 7*) to be archived, the backup can be carried out.

To start the backup, using one of the following methods:

•	From t	he	File	menu	File	Backup Options	Restore Option	ns Help
	select <b>B</b> a	ackup			۵	Backup	Ctrl+B	1
		leitup	,		٢	Prepare for Backu	p Ctrl+F	iles Expl
					S	Restore	Ctrl+R	· · ·
					$\bigcirc$	Backup All	Ctrl+A	
						Remember Size or	n Exit	
						Save Option Settin	ngs on Exit	
						Associate File Exte	ension	
						Exit		
•	From th						~ ~	
	the first	but	ton,	Backup	1	2 @ 4	🙁 🗣	
	site					13	1	

• Press [Ctrl] + [B] simultaneously on the keyboard

Note: If you select one of the above options, and no site has been prepared for backup, the warning "You must prepare a site" will appear.

When any of the above options is selected, and a site has been properly prepared, the following message box will be displayed:

Note: The site contained in the message box will be the one selected from the sites list and not necessarily "Office Block" as shown in the example above.

If you press the No button, the program will return back to its previous state. If you press the Yes button, the Select File dialogue box will open:

Select the drive and/or directory to store backup								
Save jn: 🗐	(C:)	•	E	<u></u>	*	i 🖽		
Adobeapp Backup Cylon Softw My Docum Novell NVIDIA TN		Pagemgr Pmail Program File Temp Windows	s					
File <u>n</u> ame: Save as <u>t</u> ype:	Local Network.CCB			- [ - ]	<u>S</u> ar Can <u>H</u> e	icel		

The File name text box will contain the current site description, which can be changed to any legitimate Windows file name. You can also change the destination to which the backup will be saved.

If you press the Cancel button, the program will return back to its previous state.

## CXpro<sup>HD</sup> Site Backup Utility | Using The Site Backup Utility

If you press the **Save** button, the program will create the required backup. During the backup process the program will continually update the status bar at the bottom of the window with the current file being processed and will update the progress bar at the top of the window as necessary

C:\CYLON SOFTWARE\WN3000V4\OFFICEBK\STRAT5\COMPARATO	

Note: The backup process can be cancelled at any time by selecting the fourth button on the toolbar "Cancel current operation"

When the backup has been successfully completed, the following message will be displayed:

Confirm	×
?	Back up of site :
~	OFFICE BLOCK
	completed successfully.
	<u> </u>

Press OK to return to the Backup Interface.

#### IF A SITE IS NOT PREPARED...

If you try to run a backup without setting up properly, the following dialog will be displayed:

If you select Yes, the program will go into the **Prepare Site for Backup** procedure, so that you can select files for backup (*see page 7*).

You must also set the correct backup options (see page 6).

When the site is prepared, you can return to running the backup (see page 10).

# **BACKUP OPTIONS**

Each of the options below can be selected from the Backup Options menu,

File	Back	kup Options Restore Options	Help
4	~	Exclude *.BAK files	1
Site	~	Exclude *.CSV files	Exp
BA		Ignore "Backups" Directory	

or the Select Backup/Restore Options dialog box:

Select Backup/Restore Options		
Backup Options ✓ Exclude *.BAK files ✓ Exclude *.CSV files ☐ Ignore "Backups" Directory	Restore Options Confirm file overwrite Overwrite WN3000 units section Settings Save option settings on exit	
🖉 Restore Defaults	🗸 OK 🛛 🗶 Cancel	

#### Exclude \*.BAK files

Some programs, such as **CCView** can generate files, which are duplicates of other files, with the extension .BAK. These act as a 'safety measure' in case something goes wrong with the main file. They are not necessary to the operation of the site and so can be excluded from the site's backup in order to make the .csb file smaller, and save disk space.

When this item is selected then during a prepare for backup the program will check each file that it is adding to the File(s) list box to see if its file extension is .BAK, if it is then the program will not include the file in the File(s) list box.

#### Exclude \*.CSV files

A site may contain .csv files, which are archives storing historical data from datalogs in the site. This information is not required for the operation of the site, and so can be excluded from the backup in order to reduce the size of the .csb file, and save disk space.

When this item is selected then during a prepare for backup the program will check each file that it is adding to the "File(s)" list box to see if its file extension is ".csv", if it is then the program will not include the file in the "File(s)" list box.

# **RESTORING A SITE**

**'Restoring**" a site means copying files from a **Backup** compressed (.csb) file onto a PC to create or adjust a **Cylon** site. This can be carried out:

- on the PC that created the .csb file originally, to repair a damaged site, or
- on another PC, to create a duplicate site. This can be used to set up a portable PC for a site visit, or to synchronise modifications made to a site on several PCs.

A **Site Restore** operation can be carried out with different options, for instance overwriting existing files, or rebooting the computer on completion, so before running a Site Restore operation, you must set the **restore options**.

Also, before a **Site Restore** operation, you can view the contents of an existing backup (.csb) file, to check if it's the one you want to restore (*see page 17*).

When the restore options are set, and you have selected the correct .csb file, you can **run** a Restore site operation.

## SETTING THE REQUIRED RESTORE OPTIONS

It is possible to select certain criteria that the program will use when restoring a site from a backup. There are two methods of selecting the required restore options:

•	From the <b>Restore Options</b> menu select the required menu	Restore Options Help	
	item(s)	Confirm File Overwrite Overwite Units in WN3000.II View CSB Contents	NI File
or,			
•	From the toolbar select the button Select backup/restore options	<sup>ifth</sup>   🖓 🎯 🕹   🛞   🗨	

From Select button Select backup/restore options

o 🕸 🕹 🕺 😵 📢 🕚
---------------

then from the displayed **Options dialog box** select/deselect the required items. For details see

CXpro<sup>HD</sup> Site Backup Utility | Using The Site Backup Utility

*Restore* Options on page 17.

### **RUNNING A SITE RESTORE OPERATION**

To start to **Restore** a site, use one of the following methods

- From the File menu select Restore,
- From the toolbar select the third button, Restore site

• Press [Ctrl] + [R] simultaneously on the keyboard

If any of the above options is selected, the Select files to Restore dialog will appear:

Select file to restore from		? ×
Look jn: 🖃 (C:)	- 🗈 💆	
Adobeapp	🚞 Pagemgr	
📄 Backup	🚞 Pmail	
🔁 Cylon Software	🚞 Program Files	
Av Documents	🚞 Temp	
🔁 Novell	🚞 Windows	
NVIDIA TNT M64 Video Driver		
·		
File <u>n</u> ame:		<u>O</u> pen
Files of type: WN3000 backup fi	les (* och)	Cancel
Twittooo backup ii	ica (1000)	

The dialogue box will list any current **Backup** type (.csb) files in the selected directory. If the file you wish to restore is an older **Backup** type or a **Backsite** type then these can be selected from the **Files of type** drop down list box.

You can change the source directory listed in the dialog box by selecting from the Look in box, or by clicking on listed directories.

Select a file or enter the name of the file in the File name box.

If you press the Cancel button, the program will return back to its previous state.

If you press the **Open** button, the program will read the selected backup and the following message box will appear:

Confirm	×
?	Do you wish to restore site :
¥	OFFICE BLOCK
	Backed up on 25/05/00 16:47:27
	Note : site on hard disk was last backed up on 25/05/00 17:05:30
	<u>Yes</u> <u>N</u> o

Note: The Site contained in the message box will be the one contained within the selected backup, and not necessarily the one shown above.

- If you press the No button, the program will return back to its previous state.
- If you press the Yes button, the program will restore the selected backup.

Note: If the .csb extension has been associated with the Site Backup Utility in the Windows operating system (see Associate File Extension on page 22), then when a file with a .csb extension is selected in Windows Explorer, Backup will run and automatically start the restore operation for the selected file.

# CXpro<sup>HD</sup> Site Backup Utility | Using The Site Backup Utility

During the restore process the program will continually update the status bar at the bottom of the window with the current file being processed and will update the progress bar at the top of the window to show how much of the process is complete.

	JOI I MAIL	-11143000			_/

Note: The backup process can be cancelled at any time by selecting the fourth button on the toolbar Cancel current operation.

	<b>P</b>	<b>(</b> 2)	ØB ØR	2

Note: If a restore is cancelled during its operation, then you should not use the site that was being restored. Some necessary files may be missing, leading to unpredictable results. If you need to work on the site, first re-run the restore operation, and allow it to finish without cancellation.

# **RESTORE OPTIONS**

Each of the options below can be selected from the Restore Options menu,

Re	store Options Help		
Confirm File Overwrite			
	Overwite Units in WN3000.INI File		
View CSB Contents			

or the Select Backup/Restore Options dialog box:

Select Backup/	Restore Options
Backup Options ✓ Exclude *.BAK files ✓ Exclude *.CSV files ☐ Ignore "Backups" Directory	Restore Options Confirm file overwrite Overwrite WN3000 units section Settings
Restore Defaults	Save option settings on exit

#### **CONFIRM FILE OVERWRITE**

When this item is selected then during a restore if a file currently exists on the hard disk of the machine the program ask if this file is to be overwritten.

### **OVERWRITE WN3000 UNITS SECTION**

When this item is selected then after a restore the program will copy the contents of the UNITS.INI file contained within the restored projects sub-directory to the WN3000.INI file in the UnitronUC32 System directory, overwriting items where necessary.

# CHANGING THE CURRENT DEFAULT SITE

The "Default Site" is the site to which **CXpro<sup>HD</sup>** will connect when it is started. Usually, to change the site that **CXpro<sup>HD</sup>** will use as its default, you must start the software, change the default in the **Configuration Utility**, and then close the software and re-start it.

The **Site Backup Utility** has a facility to change the default **Site** for **CXpro<sup>HD</sup>**, whether or not the software is running.

To do this, right-click on the required site in the Site Backup Utility's Site List tab.

The following message box will appear

Note: The site contained in the message box will be the one selected and not necessarily the one shown above

If you press No the program will continue with the current operation.

If you press Yes the program will make the selected site the current site, and will ask one of the following questions, depending on whether the **Cylon** software is currently running:

If Cylon software is currently running

## CXpro<sup>HD</sup> Site Backup Utility | Using The Site Backup Utility

Confirm		×
?	Do you wish to restar	t Windows now?
	Yes	<u>V</u> o

- If you press No the program will continue with the current operation.
- If you press Yes the program will restart Windows and then close.

#### If Cylon software is not currently running

Confirm			×
?	Do you wish	to run WN3000	now?
	Yes )	<u>N</u> o	]

- If you press No the program will continue with the current operation.
- If you press Yes the program will start the Cylon software and then close.

Note: If the current site is changed when the **Cylon** software is currently running and **Windows** is not restarted then unpredictable results within the **Cylon** software may result.

# SAVING THE OPTION SETTINGS

If the Save Option Settings on Exit option is set, the Backup/Restore Options settings will be stored when the program is closed. When the program is next opened, the settings will be automatically retrieved.

Each of the options below can be selected from the Backup Options menu,

		kup Options Restore Options	Help
4	~	Exclude *.BAK files	1
Site	~	Exclude *.CSV files	Exp
BA		Ignore "Backups" Directory	

or the Select Backup/Restore Options dialog box:

Select Backup/Restore Options		
Backup Options ✓ Exclude ".BAK files ✓ Exclude ".CSV files ☐ Ignore "Backups" Directory	Restore Options Confirm file overwrite Overwrite WN3000 units section Settings Save option settings on exit	
Restore Defaults	🗸 OK 🛛 🗶 Cancel	

# VIEWING THE CONTENTS OF AN EXISTING BACKUP

The contents of a backup can be viewed by selecting the View CCB Contents menu item from the Restore menu.

Re	store Options Help
	Confirm File Overwrite
	Overwite Units in WN3000.INI File
	View CSB Contents

The Select file to restore from dialogue box will appear:

	? X
💌 🖻 🛃 📰	<b>=</b>
Pagemgr	
🔁 Pmail	
🗎 Program Files	
🗋 Temp

# 3 The Site Backup Utility Interface

The **Site Backup Utility** interface displays Menus, Toolbar Icons, and windows from which all of the **Site Backup Utility**'s functions can be accessed.

## THE MENU BAR

File Backup Options Restore Options Help

The Menu Bar, at the top of the Site Backup Utility interface, contains menus that give access to all Backup's functions. To open a menu, click on its name in the menu bar.

#### **FILE MENU**

The file menu contains options that send information from and to files

File	Backup Options	Restore Option
۵	Backup	Ctrl+B
٢	Prepare for Backup	Ctrl+F
S	Restore	Ctrl+R
0	Backup All	Ctrl+A
	Remember Size on Save Option Setting	
	Associate File Exter	nsion
	Exit	

#### Backup

Selecting this option from the File Menu starts the Backup operation (see page 6).

It is the equivalent of the Backup button on the toolbar, or pressing [Ctrl] + [B] on the PC's keyboard.

#### Prepare for Backup

Selecting this option from the File Menu starts the Select files for backup operation (see page 7).

It is the equivalent of the Prepare for Backup Button on the toolbar, or pressing [Ctrl] + [F] on the PC's keyboard.

#### Restore

Selecting this option from the File Menu starts the **Restore** operation (*see page 12*). It is the equivalent of the **Restore** button on the toolbar, or pressing **[Ctrl]** + **[R]** on the PC's keyboard.

#### Remember Size on Exit

When this option is ticked on the File menu, the position of the **Site Backup Utility** on the PC screen will be stored when the program closes. When the program is next opened, it will appear in the same place on the screen as it was when the program was closed.

#### Save Option Settings on Exit

If this option is ticked on the File menu, the **Backup Options** settings will be stored when the program is closed. When the program is next opened, the settings will be automatically set.

#### Exit

Selecting this option from the File menu closes the Site Backup Utility.

#### Associate File Extension

Selecting this option allows you to make an 'association' on your PC between the .csb filename extension and the **Site Backup Utility**. This means your PC will recognize that .csb files are to be opened with the **Site Backup Utility**.

When you select the Associate File Extension option from the File menu, the following message appears:

Confirm	×
?	Are you sure you want to change the registry settings?
	Yes <u>N</u> o

If you press No, the program will return to its previous state.

If you press Yes, the Windows registry will be changed to associate .csb with the Site Backup Utility.

When the association is made, the following message appears:

CCBackup Utility	×
CCB file extension successfully regis	stered.
()	

Press OK to return to the Site Backup Utility Interface.

#### **BACKUP OPTIONS MENU**

Backup Options		Restore Options	H
~	Exclude *.BA	AK files	
~	Exclude *.CS	SV files	
Ignore "Backups" Directory			

The Backup Options menu allows you to enable or disable different options affecting the Backup operation.

If an option has a tick beside it in the menu, it is enabled for the next backup operation. If there is no tick, the option is disabled.

For more information about the individual options, see

Backup Options on page 12.

RESTORE OPTIONS MENU		
Restore Options Help		
Confirm File Overwrite		
Overwite Units in WN3000.INI File		
View CSB Contents		

The **Restore Options** menu allows you to enable or disable different options affecting the **Restore** operation.

If an option has a tick beside it in the menu, it is enabled for the next backup operation. If there is no tick, the option is disabled.

For more information about the individual options, see

Restore Options on page 17.

#### **HELP MENU**

The Help menu offers several sources of information about the Site Backup Utility and Cylon Controls.

Site Backup Utility User Guide

<u>H</u> elp			
CCBackup <u>U</u> ser Guide			
Cylon Controls Home Page			
A <u>b</u> out			

This opens the on-line manual for the Site Backup Utility

Cylon Controls Home page

<u>H</u> elp
<u>U</u> sing CCBackup
Cylon Controls Home Page
A <u>b</u> out

Clicking on this causes the PCs default browser to open, and to load the Cylon Controls web page, from **www.cylon-controls.com** (which redirects to www.cylon.com).

About the Site Backup Utility

<u>H</u> elp		
<u>U</u> sing CCBackup		
Cylon Controls Home Page		
A <u>b</u> out		

This opens a box displaying information about the current version of the Site Backup Utility.

# THE TOOLBAR

The Toolbar, located just below the Menu bar on the Site Backup Utility interface, contains buttons that act as short cuts to the most common features of the Site Backup Utility.

Backup Site button

Pressing this button on the **Toolbar** starts the **Backup** operation (*see page 6*). It is the equivalent of the **Backup** option on the **File** menu, or pressing [Ctrl] + [B] on the PC's keyboard.

Prepare Site for Backup button

Pressing this button on the Toolbar starts the Select files for backup operation (*see page 7*). It is the equivalent of the Prepare for Backup option on the File menu, or pressing [Ctrl] + [F] on the PC's keyboard.

Restore Site button

## CXpro<sup>HD</sup> Site Backup Utility | The Site Backup Utility Interface

Pressing this button on the **Toolbar** starts the **Restore** operation (*see page 12*). It is the equivalent of the **Restore** option on the **File** menu, or pressing [Ctrl] + [R] on the PC's keyboard.

**Cancel Current Operation button** 

This toolbar button allows you to cancel the current operation in the Site Backup Utility.

If you select **cancel**, the following message will appear:

carreer	the carrent operation in	
Confirm	×	
?	Do you wish to CANCEL the operation!	
	<u>Yes</u> <u>N</u> o	

If you press No, the program will continue with the current operation. If you press Yes, the current operation will be cancelled and the program will return to its previous state.

Select Backup options button

Pressing this button on the toolbar opens the Select Backup/Restore Options dialog box.

Select Help button

Pressing this button on the toolbar opens the About Backup box.

## THE DETAILS WINDOW

The **Details Window** is the lower part of the **Site Backup Utility** interface. It displays information about the files that make up a site, and are to be backed up or restored.

Tabs along the top of the **Details window** represent the different types of information available about files and sites.

## **DETAILS WINDOW - SITE LIST TAB**

The Site List tab shows all the sites installed on the PC. To back up a site, or view details about a site, it must be selected in this window.

Site name :	Directory name :
Office Block	OFFICEBK
ID code :	Modem number : Network :
Remote :	
U Site number :	Internet :
2 IP address :	Port :
Last backed up :	Last restored :
00/00/00 00:00:00	00/00/00 00:00:00

#### **DETAILS WINDOW - SITE DETAILS TAB**

The Site Details tab shows detailed information about the site selected in the Site List tab.

This information helps ensure that the correct Site has been selected for backup.

### **DETAILS WINDOW - SELECTED FILES TAB**

The **Selected Files** tab shows the directories and files that make up the site that has been prepared for backup.

The directories are listed in the top part of the window, the files are listed in the lower part.

How to remove a directory from the Select Files tab

To remove a directory from the backup select the required directory then press the right mouse button. The **Confirm** dialog will appear:

MAN0137 rev 2

# CXpro<sup>HD</sup> Site Backup Utility | The Site Backup Utility Interface

- If you press the No button, the program will return back to its previous state.
- If you press the Yes button, the selected directory(s) will be removed from the Directory(s) list box along with any associated sub-directories and any associated files will be removed from the File(s) list box.

Note: It is possible to select multiple directories using the [Shift] and [Ctrl] keys on the PC's keyboard.

How to remove a File from the Select Files tab

To remove a file from the backup select the required file then press the right mouse button.

The Confirm dialog will appear:

Confirm	×	
ৃ	Delete selected file?     C:\wN3000V4\P12803\ARCH0001.INI	
	Yes <u>N</u> o	

The **Confirm Delete Files** box will appear:

- If you press the No button, the program will return back to its previous state.
- If you press the Yes button, the selected files will be removed from the "File(s)" list box.

Note: It is possible to select multiple files using the [Shift] and [Ctrl] keys on the PC's keyboard.

#### **DETAILS WINDOW - EXPLORER TAB**

The Explorer tab allows you to examine the details of any site installed on the PC without selecting it for backup. The details shown are the same as those shown in the Site Details tab for the site selected in the Site List tab, but can be displayed for any or all sites.

This tab allows you to browse through the installed sites, and is useful to compare different sites, or to identify a site for backup, etc.

### **DETAILS WINDOW - CCB CONTENTS**

Site List Site Details Selected Files Explorer CCB Contents	
CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\UCC4.IDX CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\WIDEGLB.IDX CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\3\UC16.IDX CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\3\UC16_3 CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\3\UC16_1 CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\3\UC16_1 CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\3\UC16_1 CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\3\UC16_4 CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\3\UT16_4	•
CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\2\UC16.IDX CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\2\UC16_4 CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\2\UC16_3 CYLON SOFTWARE\WN3000V4\OFFICEBK\DBASE\2\UC16_2	I

The CCB Contents tab is used to list the files that are stored in the file created by a previous backup.

To choose the files to display, select View CCB contents from the Restore Options menu.

# THE OPTIONS DIALOG BOX

The options that govern the Backup and Restore processes may be set either from the individual Backup Options and Restore Options menus, or from the Select Backup/Restore Options dialog box:

Select Back	rup/Restore Options
Backup Options ✔ Exclude *.BAK files ✔ Exclude *.CSV files	Restore Options Confirm file overwrite Overwrite WN3000 units section
Ignore "Backups" Directory	Settings
	V OK X Cancel
This dialog opens when you pre- the toolbar:	ss the Options button on 🛛 🎝 😳 🕹 🛛 🗐 🗐 🗊

You can select an option by placing a tick in the check box beside it. To de-select an option, clear the checkbox beside it.

Descriptions of the different options are given in

# CXpro<sup>HD</sup> Site Backup Utility | The Site Backup Utility Interface

Backup Options on page 12 and

*Restore* Options on page 17.

If you press the Cancel button, the dialog box will close and program will return to its previous state.

If you press the **Restore Defaults** button, the check boxes will be changed back to their default condition, the dialog box will close and program will return to its previous state.

If you press the **OK** button, the new setting will be used when a site is prepared for a backup.

Note: The chosen settings will not be remembered the next time the program is run unless the ave settings on exit menu option is selected form the File menu File Backup Options Restore Option Backup Ctrl+B Prepare for Backup Ctrl+F Restore Ctrl+R Backup All Ctrl+A Remember Size on Exit Associate File Extension Exit
