SUBJECT: **NEW PRODUCT ANNOUNCEMENT | Aero^{BT} CAPACITIVE TOUCH SCREEN**

_____

Cylon Introduces Aero^{BT} | New Test and Balance App to Simplify Air Testing and Balancing

Aero^{BT} is Cylon's new free and easy to operate, mobile application that's designed to enhance and expedite air balancing by performing the Variable Air Volume (VAV) testing through a smart device. The new **Aero^{BT}** performs test, adjust and balance services on all HVAC systems from anywhere.

Aero^{BT} Calibrates installed VAV box controllers and verifies that the VAV box airflow meets the design specifications.

Features of the new Aero^{BT}

- iOS, Android, tablet mobile application
- Calibrates Cylon's **CBV Series: CBV 2U4-3T** and **CBV2U4-3T-N**
- Intuitive tool for VAV balancing
- Ability to drive a VAV to max or min flow setpoint
- Performs auto calibration by simply entering measured airflow
- Override and close dampers
- Color-coded status indications guide you through the testing process
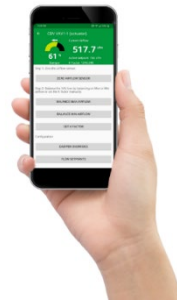

NEW PRODUCT ANNOUNCEMENT

Benefits of Aero^BT include:
- Secure access to Cylon **CBV Series** controllers
- Enables a streamlined calibration process
- Easy to use, intuitive tool for VAV balancing
- Dramatically reduces time
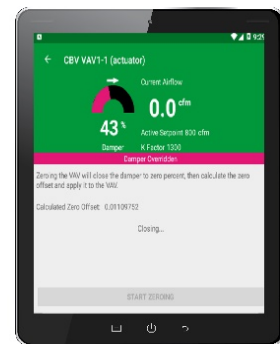

NEW FEATURE HIGHLIGHTS INCLUDE

Calibration Supports the CBV Series via Mobile Apps
iOS, Android, Tablet mobile application for fast and easy calibration of Cylon **CBV Series**, **CBV 2U4-3T** and **CBV2U4-3T-N**.

Override and Close Dampers
Provides you with powerful analyzing and reporting tools to use no matter where you have decided to record historical data. Charting options now allow you to select trends from a tree rather than a table, saving development time.

PRODUCT AVAILABILITY

Aero[BT] only integrates with Cylon's **CBV Series of controllers.** The Free **Aero[BT]** App is available for immediate download on May 28, 2019 from Google Play™ or the App Store®.
