

January 2022

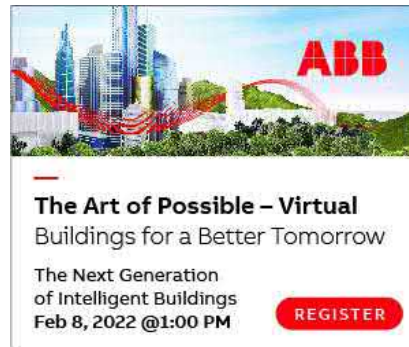

The Better Buildings Newsletter
A round-up of happenings from ABB Building Solutions, Americas

Join us at AHR Expo 2022 in Las Vegas

Booth **C1559** in Building Automation and Controls is where you want to be! Watch live demos of FusionAir, ABB BE Sustainable with Active Energy, ABB BE Space-Efficient, and solutions from Emergency Light and Door Entry Services. Join us at our [breakfast presentation](#) and awards ceremony, and again at our [evening rooftop reception](#) atop the Paris Hotel. We also are showcasing FusionAir in the [New Products Pavilion](#) and have a scheduled [2022 Vision & Planning Session](#). Free [VIP passes](#) are still available. This is one event you don't want to miss.

Spotlight

Join The Art of Possible: Buildings for a Better Tomorrow

Efficient, safe, productive, sustainable. Learn about the next generation of Smart Buildings through the ABB virtual webinar series **Buildings for a Better Tomorrow – The Art of Possible**. Beginning **February 8, 2022, at 1:00 PM ET**, industry experts will share how digitalization and connectivity are transforming the future of our living and working worlds.

Registration includes access to your choice of three webinars presented by industry experts. Presenters will focus on exploring the next generation of intelligent buildings. Join us live or view on-demand at your convenience.

ABB wins 2021 Frost & Sullivan Global Product Leadership Award for Intelligent Buildings

ABB has earned the 2021 Frost & Sullivan Global Product Leadership Award in the intelligent buildings industry. The company's integrated smart buildings solutions include energy management systems that can drive operational efficiency, reduce energy consumption by up to 40 percent, minimize costs, and increase occupant comfort.

Frost & Sullivan recognized ABB's digital leadership, wherein ABB combined building hardware and software with advanced technologies, including artificial intelligence (AI), machine learning (ML), and cloud services.

ABB Interactive Landscape

ABB Building Solutions transform the way we think about commercial spaces providing technologies that drive the performances for the buildings of tomorrow.

Explore the 3D space of ABB Building Solutions and discover the benefits for each building type, envisioning how the Building Performances fulfill your needs and exceed your expectations.

1:00 PM EST Webinar Options

- 1.** How Intelligent Buildings Support the Future
- 2.** Network Solutions and Services for Smart Buildings & Data Centers
- 3.** Intelligent Buildings are the Sustainability Drivers of the Future

Interactive Landscape

Commit to Zero

Everyone is talking about net-zero. But how do you get there? ABB Building Solutions can help.

We offer more than just the hardware and software of decarbonization. We offer a comprehensive method built on decades of expertise.

Our smart building technology has helped many thousands of buildings and homes consume energy more efficiently.

Intelligent and automated lighting, air-conditioning, heating, and movement detection systems enable building owners to manage power consumption.

Partner with us and turn climate ambition into concrete action.

Mission to Zero

System Integrator Benefits

ABB Building Solution products and solutions are built on an open platform and offer flexible point configuration. Enhanced diagnostic tools and software provide for strategy simulation and testing, efficient commissioning and testing, resulting in a more robust solution with reduced installation, maintenance, and time on site.

Benefits include:

- Cost-effective solution
- Flexibility to expand
- Open platform
- Dual platform
- Easy to engineer and deliver
- Reduced diagnostic time

[More Benefits](#)

Choosing the Right Technology Partner is Critical in Multi-site Retail

Energy is probably one of your company's biggest operating expenses. And electric and natural gas rates have increased multiple times in the last 20 years. But with the right solution, energy is a manageable expense.

eBuilding is ABB's building and energy management system that allows buildings to leverage investments already made. It provides an intuitive interface to monitor and control HVAC, lighting, refrigeration, and sensor devices across your enterprise.

When our hardware and advanced software solutions join forces, building performance goes up and costs come down.
